*Soullier home, Cheboygan*

Full Circle  
Project of  
the Month

**W**e contacted Full Circle on a recommendation from our insurance company. Our roof had leaked very badly during a rainstorm. The water damaged two levels of our home, including ceilings, walls, flooring, interior doors and furniture.

Full Circle came out and did an evaluation and estimate for the repair work. They created a silica plan for this project as the walls were lath and plaster, which when removed, would generate a lot of dust. Full Circle took measures to protect not only the damaged area but the rest of our home from all this dust.

The project was to dry out the wet areas completely, remove damaged materials and replace with new. This included installation of dry wall on ceiling and walls, new

doors and new carpeting. Some electrical work also needed to be done and Full Circle took care of coordinating that project for us as well.

Full Circle went the extra mile to redo a tabletop that was damaged by water. They also stopped over on Memorial Day to help with finishing trim.

Jason, Dan and Shannon were very courteous and professional. While this work was done, we stayed elsewhere, but they

were very good at giving us updates and pictures of the progress.

Our experience with Full Circle was delightful and we have already recommended them to others! They definitely take pride in their work and care about their customers. Thank you, Full Circle!
